Arrakis Consulting Fortifying Compliance Frameworks

Cybersecurity compliance is a crucial factor for the success and resilience of businesses, irrespective of their size or industry. Yet, many businesses resist change and cling to outdated practices, unaware of the escalating cyber threats and evolving regulations.

Arrakis Consulting, a leading cybersecurity company specializing in compliance and risk, dedicates its efforts toward helping clients 'achieve compliance' and 'maintain a compliant posture' within their respective regulatory environments.

Arrakis Consulting instills the 'culture of change' in organizations that resist change. Through proactive monitoring and strategic guidance, it helps clients navigate this cultural shift in cybersecurity confidently. Providing complete regulatory updates, it guides clients to maintain continuous compliance and helps shield businesses from online threats, reducing regulatory and contractual risks.

"The regulatory environments don't care how big or small a company is. You're either compliant or not," says Carl Carpenter, CEO of Arrakis Consulting.

Its cybersecurity compliance services ensure the secure handling of sensitive data, including organizational information, employee data and intellectual property (IP), fostering a safe business environment.

Arrakis Consulting also offers accredited and unaccredited training to help increase the skillsets of businesses, making them more resilient to cyber threats and better equipped to navigate complex regulatory environments. The professional certifications include courses like ISO27001, ISO27005 and CMMC for accredited and various other unaccredited trainings.

Guidance is provided to clients throughout the compliance journey, leading to certification in chosen regulatory environments or security frameworks. Post-certification, Arrakis Consulting offers continuous support to maintain compliance with reduced consulting hours, helping to make clients more self-reliant.

Achieving or maintaining compliance with regulations can be challenging for businesses. Handling it internally can incur significant costs, consume time and demand substantial effort from them. Arrakis Consulting provides 23 'managed services' and 'managed security services' (MSP/MSSP), such as Enterprise Anti-Virus and Security Operations Center, and services like data loss

Carl Carpenter,
CEO

The regulatory environments don't care how big or small a company is. You're either compliant or you're not

protection, identity access management and backup solutions, aimed at minimizing internal workload, mitigating risk and enhancing compliance.

It conducts thorough security assessments to identify cybersecurity and regulatory vulnerabilities, reducing the risk of breaches. It has partnered with various governance, risk, and compliance (GRC) tool vendors to provide clients with tailored GRC instances to meet their needs. Virtual services, including virtual chief information security officer (CISO) and virtual data protection officer (DPO), are available to fulfill specific role requirements.

Banking on a wealth of expertise and a track record of success, Arrakis Consulting provides the information security services required by all regulatory environments. These include business impact assessments, business continuity and disaster recovery, risk assessments, vendor due diligence, vulnerability assessments, penetration testing, social engineering, physical security testing, policy creation and review. It also offers network security architecture and design, investigations, forensics, and information security assessment.

Through its continuous consultation, Arrakis Consulting keeps clients informed about non-compliance issues that may lead to general data protection regulation (GDPR) fines or other regulatory penalties. It ensures clients navigate

through the stringent requirements of regulatory frameworks of the Department of Defense or the intricacies of medical regulations. Arrakis Consulting also handles the complexities of commercial and financial compliance besides introducing the nuances of GDPR privacy standards. It is steadfast in providing tailored solutions to meet each client's needs.

Scalable solutions and flexible pricing models offered by Arrakis Consulting ensure that even the smallest of businesses can access the expertise and support needed to achieve compliance without budgetary constraints.

Highly skilled, experienced, and certified personnel are Arrakis Consulting's pride assets. Each team member has diverse background and technical expertise bringing comprehensive customer support, minimizing the need for multiple specialists and reducing costs for clients.

Arrakis Consulting empowers organizations to become compliant or stay compliant in cybersecurity, fostering a safe business environment. **CR**
