Case Study: ISO 27001 Assessment and implementation

The client has an international presence in a regulated industry and must be compliant in an every changing landscape of regulation.

Arrakis provides an ISO 27001/2 assessment to help the client identify information security risks, develop or encourage risk prioritization, and help develop a remediation plan.

Problem

- Comprehensive assessment of the entire information security program.
- Demands for compliance
- Demands for a plan to mitigate risk
- Compliance is required as well as other possible financial regulations locally to branch offices in specific countries.
- Client would like a solid growth plan to ensure a lower risk for “threats of the future”.

Solution

- Assess current policies, procedures, and controls to ensure alignment with ISO 27001.
- Conduct interviews with key personnel and evaluate artifacts as they are provided.
- Provide an executive summary of the current state of the client in comparison to ISO27001 as well as a detailed report showing risk and remediation recommendations.

Outcome

- Access to Arrakis resources that have the skills and knowledge to demonstrate compliance to regulators and auditors.
- Identified areas with risk and suggestions for improvement.
- Remediation activities to manage risk and presented in a prioritized manner.
- Transparency of all Arrakis involvement with the client.
