

Private Hosting Services

Arrakis Consulting, LLC

Securing your world together

Company Overview

- Reliable
- Consistent
- Trusted Agent
- Proactive
- Forward thinking

Arrakis is uniquely positioned to provide numerous consultation and technology related services at all levels of business and all sizes or types of clients. Arrakis will help you to transform your IT operations from a reactive mode of crisis management to a proactive mode of preemptive management. We'll partner with you to determine your technology strengths and weaknesses, then quickly attack the weaknesses while minimizing any disruption to your business.

The leadership of Arrakis is composed of experienced business professionals with an extensive federal and military background. All members of Arrakis are required to conform to three key words of "Honor. Integrity. Excellence." and go through a rigorous validation process to ensure the highest level of professionalism.

Our experienced team of professionals have experience with commercial and government contracts of all sizes and price ranges and are available for remote or onsite support.

Contact Arrakis and lets secure your world together.

Arrakis is positioned to offer several unique private hosting services that increases your business mobility yet reduces greatly the capability for surveillance by external entities.

Cloud Storage

- Do you need your own cloud but do not have faith in any of the major vendors (*Box, Dropbox, Google, Amazon, etc.*)? Arrakis can build your own cloud technology on the very same infrastructure used by the major vendors but have end to end military grade encryption including encryption at rest. Should you want to house your own infrastructure then Arrakis can build out your personal secure private cloud structure for you that meets the requirements of the major compliance frameworks. This prevents any of the major vendors from providing your unencrypted data under a Federal mandatory disclosure act and would require any disclosure of your information to be a direct interface with you.

VPN

- If you need VPN capabilities but do not want to host your own infrastructure, Arrakis can either host your VPN services for you or build out your VPN requirements using the same infrastructure used by Amazon or Google. This allows for you to create a dynamic office environment where your FTEs can work anywhere and still retain the same feel as if in an office. Additionally, if your FTEs travel the globe, then our VPN service will create the same level of security while in a 3rd world country as if they were in the USA. All VPNs we offer use current military grade encryption.

XXXX as a service

Infrastructure as a Service (IaaS)

- Quite often clients are desiring to run as lean as possible in relation to internal infrastructure which creates the ability for a more mobile workforce and reduces costs in relation to fulltime support personnel, support agreements, work space, and downtime. Based on your needs, Arrakis can provide several infrastructure options that removes the need for you to worry about what hardware to purchase or how to support that hardware.

Information Security as a Service (ISaaS)

- Do you want to increase security for your company but don't want, or know how, to do it. Arrakis has numerous cloud based security options that can protect your company and bring you closer to best practices or compliance requirements.

Software as a Service (SaaS)

- Just like infrastructure, your company is going to need some basic software services. Arrakis can provide quite a bit of various business related software needs as a service which reduces your licensing costs as well as support for patching or updating software.

Platform as a Service (PaaS)

- All companies need basic services in order to function. Arrakis can offer various platforms for your needs including email, Phone (including secure), Active Directory, File Services, printing, etc... This reduces your need to have a support staff to manage and maintain the hardware that these would normally reside on as well as not having to increase your rental costs for space.

Hosting and Other Services

*Take the
burden off
your
shoulders.*

Training

- Arrakis personnel have years of training experience and is fully capable of providing high quality and personable training to help get your people to the next level. Specifically we can train your staff on CISA, CISM, Linux+, CCNA, Network+, Security+, and ISO27001

XXX as a service

- In todays world there are numerous opportunities to avoid having a complex environment that requires numerous persons to support. Arrakis can provide several platforms as a service which reduces the need for more staff and the overhead of keeping the equipment safe and healthy.

Web Design

- Arrakis can bring your vision of a high quality website to life. Avoid the monthly fees with other providers or the constant nervousness if someone is going to hijack your website if you don't pay your fee. With Arrakis you pay for the website and you own it outright.

Private Cloud

- Do you have a need for a secure cloud type location? Arrakis can help you get the security you need while still having cloud like functionality. Additionally, if you need to have a backup solution, we can have a dedicated Arrakis machine act as a backup client for you to ensure your company is constantly backed up.

Hosting

- Arrakis offers a full suite of hosting services including email, web, dns, shared folders, shared calendars, O365, etc... Take the burden of hosting off your shoulders and seek reduced prices with Arrakis.

Case Study: Security Assessments as a Service (SAaaS)

The client is a leading provider, for their business area, and has operations on a wide scale.

Arrakis and the client team-up to allow Arrakis to perform SAaaS as an unbiased 3rd party. The services include all aspects of a security assessment of a company respective of their size to insure that all policies, procedures, controls, and technologies are correctly used to protect the company and the companies data.

Problem

- Rapidly changing or evolving threats
- Demands for compliance
- Internal security organization is young
- High volume of technological use
- High demand for assessments
- Need for experience in security controls
- Challenges dealing with 3rd parties

Solution

- Flexible level of service based on the needs of the client
- Established process using a consistent methodology
- Risk and Threat Assessment services that can be scaled to fit the need of the client
- Vulnerability assessments, policy review, internal and external penetration testing, vendor risk assessments
- Implement a solid process that is easily scalable for future needs

Outcome

- Access to Arrakis resources that have the skills and knowledge to deal with threats
- Increase speed of execution for deliverables to reduce risk.
- Adaptable skillsets that allow for and adjust to a changing environment.
- Transparency of all Arrakis involvement with the client.
- Long term partnership with Arrakis that reduces the needs for continuous negotiation.

Case Study: Intelligence Services

The client is a person of popularity or influence where a negative image may impact their business, stock price, or professional influence in the circles the client revolves in. It is important to the client that negative influences in his/her life be minimized to a reduced and manageable situation.

Problem

- The client is well known in the industry.
- The client is a thought leader.
- The client is worth over \$50MM USD.
- The client has had occasional newsworthy mishaps that have been a negative impact.
- The client has had threats of blackmail as well as attempted KNR.
- Any future mishaps will drastically impact the client in relation to social circles, stock prices, potential for future business, and influence in professional circles.
- Overly negative incidents will cause the client to be shunned.

Solution

- Ensure a complete understanding of all new actors in the clients current and immediate future.
- Ensure a reliable set of misinformation to misdirect adversaries of the client.
- Ensure a solid counter-surveillance program is in place.
- Train the client on basic misdirection, counter-surveillance, and situational awareness.
- Ensure a solid protective plan is in place and provide reliable operational intelligence for PSD to increase safety.
- Provide technology assets that increase the electronic security of the client.

Outcome

- The client has increased freedom of movement without public knowledge.
- The safety of the client is increased.
- The client has more opportunities for secure communication.
- The client has further knowledge of the nearby persons.
- The client has increased awareness in business dealings.
- Adaptable skillsets that allow for and adjust to a changing environment.
- Long term partnership with Arrakis that reduces the needs for continuous negotiation.

World Wide range of capabilities and reach
